Also, Pixmors form newered valuable improvement in applying Insulators by which the ghost is kept dry, crusting insulators by which the ghost is kept dry, crusting the Electrical Fluid from being conducted by iron screws and drives into the secon.

The tollowing recommendations have been founished gratuitously.

Loniaville, Jan. 27, 1851.

The Lightning Conductors on the plan of J. Spratt, of Cincinnaity appear to be very well dovised, and in point of mechanical construction, are the best I have ever scene.

It is to be heped that the need if these rods may become general as an impatum aexiliery defence against a danger which must be regarded as of no ordinary magnitude, to which all hultings are liable.

Prof. of Chem. in the Univ. of Louisville.

This will certify that I have examined the Lightning Rods, Metallic Points, and Insulaing Attechments, manufactured by Mr. Spratt, of Cincinnatt, Ohio, and regard them as constructed in conformity, to the general laws of the electric Bidit; and the Gilded Copper Spranched Points, as promising, from the results of several tests to which they were submitted, to resist for years the action of those authorities of the several tests to which they were submitted, to resist for years the action of those authorities of the correct of them.

The Expedition in search of Dr. Kane .-Capt. Engle, U. S. N., Capt. Gardner, U. S. N., Lieut. Lovell, U. S. N., and the Head Ship Carpenter atteached to the Charlesrown Navy Yard, have been appointed by the Secretary of the Navy a committee to examine two steam propellors, to be purchosed by the government for the purpose or proceeding to the Arctic Seas in search of Dr. Kane and his party. The Times says they made an examination on Tuesday of the propellors "Granite State" and "East ern State," which respels are believed to be the only ones now built that are switchie and fitted for such a voyage. The ships w to built in Philadelphia, the birthplace of Dr. Kane, and the owner, R. E. Loper, Esq. of that city, has offered them at a price equivalent to only the cost of the machinery without the hull.

United States Ship Decatur .- Fears are out rinined for the anfety of the U. S. ship Decatur, as nothing definite has been heard forge for sines leaving Rio Janeiro. it will be remembered that the Decatur was reported off Rio Janeiro in September last, 14 comyany with the U.S. steamship Massachusetts, and during a terrible gale (i. ) ships lost sight of each other; the Massuchusetts succeeded in getting back to Rio m a very disabled condition, but nothing has been heard of the whereabout of the Decatur.

It was stated at the time of the sailing of Decatur, from Rio, that she would wise for a while in the Straits of Le Maire : .: hen proceed to Valparaiso. Our latest advices from Valparaiso are to January 14, up to which time no tidings of her had reach. of that port. The steamer Illinois may be expected to arrive in a day or two and will tring us about one month's later intelligence from the Pacific coast when we hope to hear something from the noble ship and her gallant crew.

A New Coal .- A preparation of stree mud with some chemical substace has been tried in New Orleans for coal, and has been Kinned to burn very well. It is sold for thirty cents a barrel, or if made by machinery at fifteen to twenty cents. The New-Orieans Exponent says:

"it lights easily; there is no offensive small emitted; but little smoke, and but very li the dust or cinders. What little cinders are left, is good for cleaning silver, brass or other similar metal; and the lashes make a to a mble sand paper, and is also good for scrabbing floors, &c. The patentee also assures us that it will not only burn well in grates (where we saw it burning)-het in stoves, furnaces for smelting and making so am. In fact it can be put to all the practical uses of wood or coul, except her the purpose of generating gas."

But for the praise which the Exponen divis to the new coal, we should think the come of the "authracite" that we have been barning was made of this preparation of usud and chemistry, with the chemistry

PROVIDENCE, March 7. The case of Horace H. Day vs. Isaac Hartahorn, which has been on trial here before the Circuit Court since the 23d of January last, was decided this morning, by a verdict in favor of Horace H. Day for the sum of \$4,000, being damages for the use of the Chaffee patent for 3 months, the time covered in the plaintiff's declara-

The main questions raised at the trial, were the validity of the Chaffee patent and the title of the plaintiff to that patent, and whether certain papers under which the defendant claimed title were fraudulently procured. The verdict was general for the plaintiff on all the questions submitted to the jury.

The case was argued for the plaintiff by N. Richardson, of New York, and Thomas | doubted sources, and evidences of which A. Jenks, of Providence; and for the defendant by James T. Brady, of New York, and Charles S. Bradley, of Providence.

HAWAIAN ISLANDS, JAN. 13. The funeral of the late king took place on the 10th. The precession was by far the most imposing ever witnessed in the islands. On the 11th, the new kind made his first appearance, and attended a council. The king addressed his native subjeets and also the foreigners. Prom the speech to the latter we extract the following :- "I therefore any to the foreigner, that he is welcome to our shores-welcome so long as he comes with the laudable mo-

tive of promoting his own interests, and at the same time respecting those of his neighbor. But if he comes here with no more exalted motive than that of building up his own interest at the expense of the natives; to seek our confidence only to betray it; with no higher ambition than that of overthrowing our government, and introducing anarchy, confusion, and bloodshed, then he is most unwelcome."

There had been much min in the islands. and extensive preparations were making

Gen. Scott and Archbishop Hughes. Some New Hampshire people having interrogated Gen. Scott, by letter, as to the truth of an averment, that in the last Presidential capvass, Bishop Hughes of New York, proposed to General Scott to sell the Catholic. vote-who hesitated to reply, when the proposition was made to General Pierce. and accepted, and a Jesuit was placed at the head of the Post Office Department-General Scott replies, that this statement so far as relates to himself is "absolutely false, and he has no doubt that it is equally so in respect to his political friends and opponents in the canvass alluded to. The

The Dominican Republic.-The population consists of whites, and a mixture of white and Indian blood, together with milattons, corresponding with that of all the Spanish American republics. A letter says :

"President Santana is a white man as well as his secretaries. Cuba is by no means, preferable to the island of St. Domingo,-On the contrary the latter is much richer than the former, having silver, gold, coal, copper and quick-silver mines; different kinds of wood, suitable for vessels, besides being the country of the mahogany and several other precious wood. If Cuba is the key of the Mexican gulf, the bay of Sanama, in the Dominican republic, is no doubt the key of the Caribbean Sea."

We extract the follling account of the extraordinary richnesof the Kern River mines from the Southn Californian :-

"Our readers haverom time to time of ate been informed ofhe fact that gold existed upon this river he its vicinity, and was being developed a moderate degree, but within the last by days, the most startling intelligences the great extent and extraordinary richnet of the Kern River country has reached a from the most unare daily and hourly forded us in the arrival and departure of feight trains, mining companies, &c., as a o in the renewed life and business of our dy. Our merchants have for the last two weeks been actively engaged in filling aders for the mines, and large quantities of gods of various descriplarge quantities of goods of various descriptions have been leaving almost consumity.

Bands of cattle and sheep are on the road, and will realize to their owners a handsome profits, as we carn that provisions are scarce and high.

Multitudes of people are leaving this city, San Gabriel, Monte, and indeed throughout the charter provides that all sums assessed shall be paid to the Treasurer which 30 days from the time that they are made payable; in delault of which a sum equal in 40 days more shall be added thereto; and a delay of 60 days more shall foreit their insurance.

It is supposed that by this time there cannot be less than from two to three thousand possile those who are flocking thither from all parts of the country.

### VERY LATEST NEWS.

Some gentlemen arrived in town yesterday evening from the mines. They confirm all that has heretofore been said of them. Miners are making from five to fifty dollars per day; goods are commanding good prices, and all are doing well. The road from our valley is literally thronged with people on their way to the mines .-The Sonorium are flocking thither by эсогея.

Appointments for the New Regiments .-Washington, Monday March 5. There is some excitement going on here in regard to the appointments of the authordinate officers for the new regiments. Members of Congress are still remaining and pressing the claims of civilians among their constituency. The War Department is businged with applications from officers of the reguhar army for premotion to these regiments. It is reported this evening that the Departabove is derived from the New Hampshire ment has made all the subordinate appoint ments from the regular army except some Second Lieutenants which are to come from the classes at West Point. The Democratic members of Congress say that the bill for the new regiments would not have passed Congress if they had thought that General Shields would not have been made a Brigadier General, or that the Department would have ignored civilians as to the subordinate appointments,
